

# I MAKE ALL THE RIGHT CONNECTIONS AT THE FAA.

## Airway Transportation Systems Specialists

### Electronics Technicians

If you think fixing critical communications equipment at an airport that lands 120 planes an hour is exciting, this is the job for you. You will be responsible for installing, testing, troubleshooting, repairing and certifying radar, communications equipment, navigational aids, airport lighting, backup power — everything air traffic controllers and pilots use for safe flight — to ensure that all systems are working properly. Duties also include maintenance of airway facility systems. You will work indoors, outdoors and travel throughout our nation connecting our systems to keep air travel safe.

### Qualifications

To begin working at the FAA you need experience as a technician, instructor, inspector or mechanic (civilian or military), knowledge of electronic theory and use of a variety of power systems and electronics equipment. Understanding basic math, electronics and computer principles is also important. These are physically challenging positions that sometimes require work in unusual locations and conditions. U.S. citizenship and pre-employment drug screening are required.

To find out more about the FAA and our outstanding career opportunities and benefits, visit our Career Web site at <http://jobs.faa.gov>.

When the FAA was established by the Federal Aviation Act of 1958, our primary responsibility was the safety of civil aviation. Today we operate the world's largest aviation system. We are responsible for the safety and certification of aircraft and pilots, for the around-the-clock operation of our nation's air traffic control system, and for the regulation of U.S. commercial space transportation. We're looking for employees to help us maintain our place as the world leader in aviation. So, if you have ambitious goals, this is the place to realize them.

The FAA does not discriminate on the basis of political affiliation, race, color, religion, national origin, sex, sexual orientation, marital status, age, disability, or any other characteristic not bearing on job performance. On an individual case basis, this agency also makes reasonable accommodations for applicants with disabilities.
