

I USE MY HIGHER EDUCATION TO FURTHER AVIATION.

Students

Don't know where to turn for an internship or after graduation? The Federal Aviation Administration is a 50,000-person government agency that runs the largest air traffic network in the world. We are on the forefront of technology innovations and need dedicated individuals, in all areas, who are interested in applying their knowledge and passion to the field of aviation. We are looking for people who want to go further in the following areas:

Air Traffic Control
Aviation Safety
Electronics
Engineering
IT
Professional Opportunities

In return for your skills we will reward you with competitive salaries, training, amazing benefits and a challenging work environment that rises above the rest.

To find out more about the FAA and our outstanding career opportunities and benefits, visit our Career Web site at <http://jobs.faa.gov>.

The FAA does not discriminate on the basis of political affiliation, race, color, religion, national origin, sex, sexual orientation, marital status, age, disability, or any other characteristic not bearing on job performance. On an individual case basis, this agency also makes reasonable accommodations for applicants with disabilities.

When the FAA was established by the Federal Aviation Act of 1958, our primary responsibility was the safety of civil aviation. Today we operate the world's largest aviation system. We are responsible for the safety and certification of aircraft and pilots, for the around-the-clock operation of our nation's air traffic control system, and for the regulation of U.S. commercial space transportation. We're looking for employees to help us maintain our place as the world leader in aviation. So, if you have ambitious goals, this is the place to realize them.
