

I CAN PROGRAM MY OWN CAREER PATH AT THE FAA.

Information Technology Specialists

With more than 50,000 employees, in multiple locations, utilizing disparate systems to move tens of thousands of flights through U.S. skies daily, there are never-ending challenges for our information technology professionals. The majority of our positions involve problem solving or troubleshooting. Program your own opportunity in one of the following areas:

Networking
Web Development
Desktop Configuration/Support
Hardware/Software Development
Site Adaptation
Data Analysis

Qualifications

Our entry-level positions require either three years of IT experience with data processing or workflow automation or a B.S. in computer science, information systems management, mathematics, statistics or engineering. You must be a United States citizen.

To find out more about the FAA and our outstanding career opportunities and benefits, visit our Career Web site at <http://jobs.faa.gov>.

The FAA does not discriminate on the basis of political affiliation, race, color, religion, national origin, sex, sexual orientation, marital status, age, disability, or any other characteristic not bearing on job performance. On an individual case basis, this agency also makes reasonable accommodations for applicants with disabilities.

When the FAA was established by the Federal Aviation Act of 1958, our primary responsibility was the safety of civil aviation. Today we operate the world's largest aviation system. We are responsible for the safety and certification of aircraft and pilots, for the around-the-clock operation of our nation's air traffic control system, and for the regulation of U.S. commercial space transportation. We're looking for employees to help us maintain our place as the world leader in aviation. So, if you have ambitious goals, this is the place to realize them.
